

**WHAT'S HOT | TENE0 STORAGE FURNITURE**

Herman Miller and Henriksen/Butler are proud to launch this new filing and storage line. Teneo products are ideal for furnishing group spaces, from conference rooms to meeting areas to project spaces to lounges – wherever people team up, connect and collaborate. Teneo also works well in individual and community spaces.

Designed by Ayse Birsel and Bibi Seck, the storage furniture represents a new paradigm in storage by providing a broad selection of adaptable products.

Carts and cabinets. Towers and lecterns. Islands and easels.

While each product is unique, they all share distinctive features – including the sweeping curves of doors and door fronts – for a unified aesthetic and consistent function.

A wide range of colors, veneers, unique cladding options and customizable finishes are available.

Each Teneo product can be repurposed and take on a different role as your needs evolve. Teneo is GREENGUARD certified and can contribute to LEED certification. MBDC Silver certification is pending for all Teneo products.

Made mostly of steel and aluminum, Teneo is largely recyclable and adheres to the McDonough Braungart Design Chemistry (MBDC) Cradle-to-Cradle protocol.

Henriksen/Butler is a member of the Herman Miller Certified Dealer Network with offices located in Utah, Nevada and Idaho.
